Generation Ship packet

Activities from Generation Ship: ARK-7 — the spinning station, its nine stations, the nine repositories, mining, and flight rules. Print this packet and work on paper.

Name: _____ Date: _____

The ARK-7 is a spinning station on its way to a new star. It stopped to mine in an asteroid field, but there was an accident, and it lost its Spanish repositories — the collections of words, cognates, idioms, verbs, dictation, and ser-versus-estar that the crew needs. Your quest is to rebuild them: speak at the stations in the agriculture ring, recover words and exercises floating in space, and mine asteroids for WATER and METAL. Guidance only, never rescue: the ship warns you at 25 and 40 km, and at 50 km you are LOST — but a lost flight is a free retry with your haul kept.

1. Put the quest in order

The first voyage has seven steps. Number them 1 to 7 in the order a new player follows them.

1. Collect your first word or exercise floating in space. — order: _____
2. Walk to the Cognates station in the agriculture ring. — order: _____
3. Deposit the other kind (WATER or METAL). — order: _____
4. Say 3 cognates at the station. — order: _____
5. Return aboard the ship. — order: _____
6. Depart the ship in your shuttle. — order: _____
7. Make your first deposit. — order: _____

2. Match the repository

Rebuilding the repositories is the ship’s quest. Match each repository to what it collects.

1. Vocabulary	a. ser and estar at the Ser vs. estar station
2. Cognates	b. dictation at the Dictation station
3. Idioms	c. verb forms at the Conjugation station
4. Verbs	d. idioms at the Idioms station
5. Dictation	e. cognates at the Cognates station
6. Ser vs. estar	f. the 1,000 floating word tiles in space
7. Saber vs. conocer	g. saber and conocer at the Saber vs. conocer station
8. Pronouns	h. pronouns at the Pronouns station
9. Por vs. para	i. por and para at the Por vs. para station

3. Match the station to its repository

Eight stations each feed one repository, and the Vocabulary repository is fed from space. Match each station to the repository it feeds. One station has no matching repository — write it in the last blank.

1. Cognates station	a. Ser vs. estar
2. Conjugation station	b. Dictation
3. Idioms station	c. Verbs
4. Dictation station	d. Idioms
5. Ser vs. estar station	e. Cognates
6. Saber vs. conocer station	f. Saber vs. conocer
7. Pronouns station	g. Pronouns
8. Por vs. para station	h. Por vs. para

1. Station with no matching repository: _____

4. Mining math

All 40 asteroids can be mined. Mining them all gives 20 WATER and 570 METAL. The first crash is free; every later crash repair costs 10 WATER and 10 METAL.

1. You have mined all 40 asteroids and hold 20 WATER. A repair costs 10 WATER. How many paid repairs can you afford?

2. You hold 570 METAL. A repair costs 10 METAL. How many paid repairs can you afford?

3. Your first crash was free. Your second and third crashes each need a repair. How much WATER and METAL do both repairs cost together?

4. Beacon warnings sound at 25 km and 40 km, and you are LOST at 50 km. You are flying at 30 km. Which warning have you already passed?

5. You hold the full haul: 20 WATER and 570 METAL. After 2 paid repairs, how much WATER and METAL do you have left?

6. Repairs are limited by whichever resource runs out first. From the full haul, how many paid repairs can you afford in total, and which resource limits you?

7. You are flying at 45 km. Which warnings have you passed, and what happens if you reach 50 km?

8. A repair costs 10 WATER and 10 METAL. You hold 5 WATER and 570 METAL. Can you afford a repair? Why or why not?

5. True or false?

Write T or F for each rule of the ship.

1. Beacon warnings sound at 25 km and 40 km. — _____

2. If you fly past 50 km you lose everything you collected. — _____

3. The first crash is free. — _____

4. A later crash repair costs 10 WATER and 10 METAL. — _____

5. Stations open automatically when you walk past them. — _____

6. Stations open with the cyan LEARN button within 8 m. — _____

7. There are 1,000 floating word tiles in space. — _____

8. There are 4,317 floating question tiles in space. — _____

9. The ship has 8 review terminals. — _____

10. The ship spins at 1.37 RPM. — _____

6. Name the nine stations

The agriculture ring holds nine stations. Write them all. Word bank: Dictation, Cognates, Ser vs. estar, Conjugation, Practice, Idioms, Saber vs. conocer, Pronouns, Por vs. para.

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____

7. Plan a voyage

Write the seven quest steps in your own words, in order. Then answer the last question.

1. Step 1:

_____

2. Step 2:

_____

3. Step 3:

_____

4. Step 4:

_____

5. Step 5:

_____

6. Step 6:

_____

7. Step 7:

_____

8. What would you do first after departing, and why?

_____

_____

8. Voyage log

Play the ship, then fill in your log. One row per voyage — or one log per player.

Record	Your voyage
Word tiles collected (of 1,000)	
Question tiles collected	
Asteroids mined (of 40)	
WATER held	
METAL held	
Crashes (was the first one free?)	
Repositories finished (which ones?)	
Furthest distance flown (km)	

9. Reflection

Answer in English or Spanish.

1. Which repository would you rebuild first, and why?

2. Would you spend your first mined WATER and METAL on repairs or save them? Explain your plan.

3. What rule keeps a pilot from getting LOST, and what would you do if the 40 km warning sounded?
